EXPERIENCE

ByteHint | Full Stack Engineer

Oct 2025 - Mar 2026

- Rebuilt company website in **Next.js**, delivering responsive design and cutting bounce rate by **15%**
- Integrated **Strapi CMS**, standardizing content management and reducing website update time by **70%**
- Resolved performance bottlenecks, boosting **Lighthouse scores 63 to 91** and reducing page load time by **30%**
- Built an alert system using **AWS CloudWatch, SNS & Spike.sh** for an application with **200K+ active users**

Deeplure | DevOps Intern

Aug 2025 - Sep 2025

- Deployed **3 microservices** via **GitHub Actions CI/CD pipeline**, cutting deployment efforts by **90%**
- Secured infra by managing **15+ secrets via Infisical**, eliminating hardcoded credentials in production
- Containerized 3 production microservices using **Docker**, enforcing consistent environments across development, and production, eliminating environment-related bugs by **80%**

Autonomys | Co-Founder & Full Stack Engineer

Sep 2024 - Oct 2024

- Co-founded & scaled a digital agency serving **small to medium-scale businesses** with **web development, UI/UX, & SEO solutions**, onboarding **4 clients within 2 months** & generating **₹40K+ in revenue from zero**
- Delivered multiple projects with **100% on-time completion**, driving a **30% increase in user engagement**
- Built a biometric attendance system(**fingerprint**), cutting manual errors by **90%** & saved **3+ HR hrs/week**

PROJECTS

Gorr | ReactJS, NodeJS, ExpressJS, Postgres, Prisma, S3, ECS, ECR, Docker, Redis, SocketIO [Live](#) | [Code](#) | [Video](#)

A production-grade **deployment platform** enabling real-time application deployment, monitoring, and live log streaming, built on top of **AWS S3**

- Architected a production-grade **microservices-based deployment platform** with live build monitoring, and dynamic domain routing, handling **100+ concurrent deployments** using **AWS ECS**
- Engineered parallel containerized builds & deployments via **AWS ECS & ECR**, reducing server strain by **90%**
- Built real-time logging system using **Socket.IO & Redis**, delivering live deployment logs with **≤100ms latency**
- Implemented **reverse proxy-based dynamic routing**, eliminating manual DNS configuration time of **4 hours**

Heimdall | ReactJS, NodeJS, ExpressJS, Postgres, Prisma, EC2, Docker, Redis, Nodemailer

[Live](#) | [Code](#) | [Video](#)

A **server monitoring platform** that prevents [Render](#), [Railway](#), & [Fly.io](#) servers from shutting down due to inactivity by automatically pinging at configurable intervals to eliminate cold starts & track real-time server stats

- Built **5 microservices** (APIs, uptime monitoring, load balancing & alerting), making **5K+ pings/day**
- Eliminated **30-50s cold starts** via scheduled pings and real-time **uptime and latency** capture, ensuring **zero downtime** across all registered services
- Engineered auto-scaling job processing with **BullMQ & Redis**, handling **5K+ jobs** with real-time failure alerts
- Built a monitoring dashboard using **React & Recharts**, leveraging **Recoil** for caching to cut API calls by **70%**
- Automated deployment of all microservices via **GitHub Actions**, cutting deployment time from **30 to 5 mins**

EDUCATION

Marathwada Mitra Mandal's Institute of Technology, Lohegaon

Pune, India

B.E. Computer Engineering

2023-2027

CGPA: 7.2

CERTIFICATIONS & ACHIEVEMENTS

- Completed the '0-100' full-stack certification from **100xDevs** under **Harkirat Singh**, gaining hands-on expertise in full-stack development and system design
